

Croplands, 2000: Asia

Global Agricultural Lands

Global Croplands in 2000 map the proportion of each 5 minute (10km) grid cell land area that is under cropland. Dark shaded areas denote higher proportion of area under cropland. Data from Moderate Imaging Spectroradiometer (MODIS) land cover product and Satellite Pour l'Observation de la Terre (SPOT) VEGETATION's Global Land Cover 2000 product were combined with UN Food and Agriculture (FAO) agricultural statistics to generate the data set.

Percent grid cell area under cropland

- Less than 10%
- 10.01% - 25%
- 25.01% - 50%
- 50.01% - 75%
- 75.01% - 100%
